EXPERIENCE

JPMorgan Chase & Co, Columbus, OH — *Software Engineer*

FEB 2020 – PRESENT

- Improved the user interface of the firm's internal test certification application using Angular/Java which resulted in more bug identification for the Chase website.
- Developed a monitoring application for the firm's certification APIs using Python which led to faster bug fixes.
- Developed an automated CI/CD pipeline for the firm's test certification application using Jenkins & Groovy which saved roughly 30 minutes of developer time daily.
- Developed a CLI tool to feed data from the firm's certification APIs into an external service using Python which resulted in improved metric visualization.
- Integrated several of the Chase website's sections into the firm's automated test framework using Jenkins, Kubernetes, & Docker which led to improved bug identification.
- Organized bonding activities for new graduate software engineers entering the firm both virtually & in person which resulted in better morale & connection.

UT Rio Grande Valley, Edinburg, TX — *Lead Math & Programming Tutor*

AUG 2015 – DEC 2019

- Tutored 120+ students a month in algebra, calculus, & programming which resulted in 20%+ increases in class averages.
